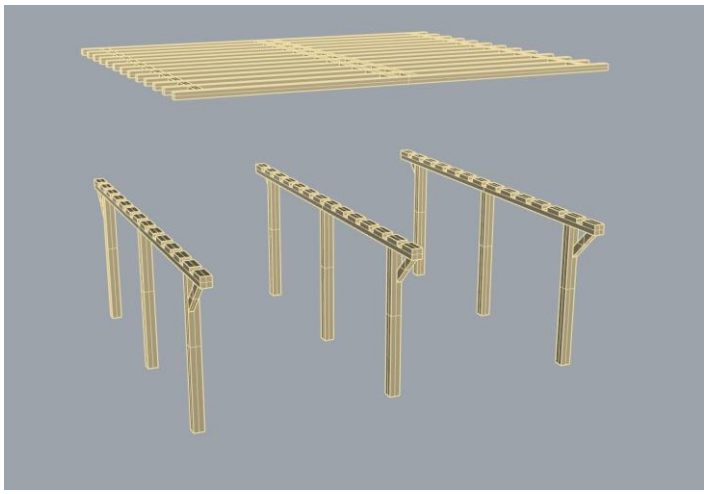
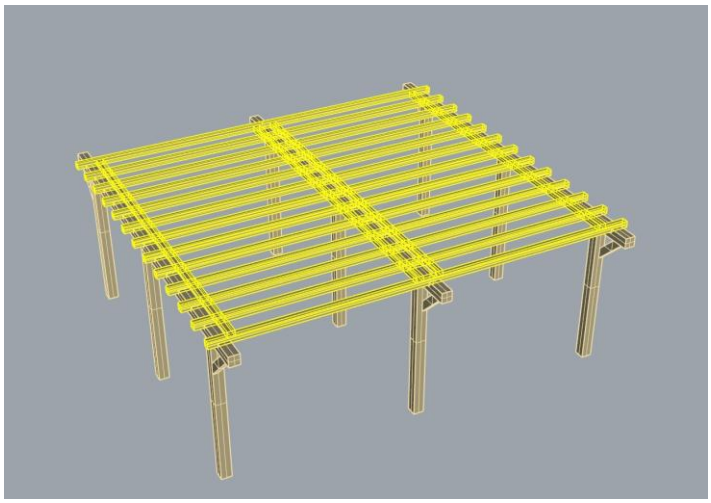
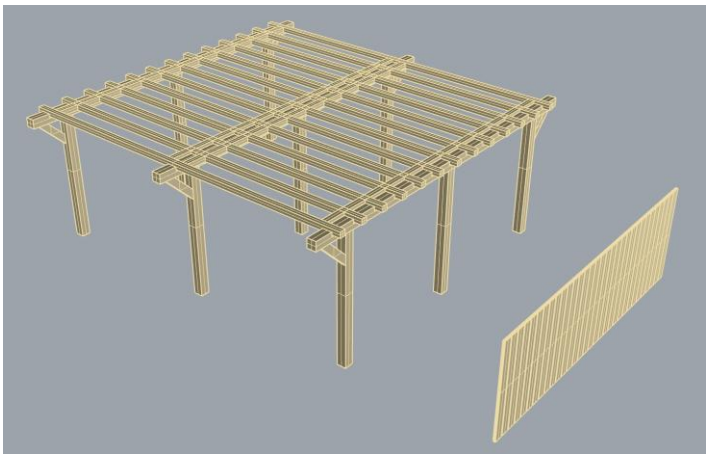
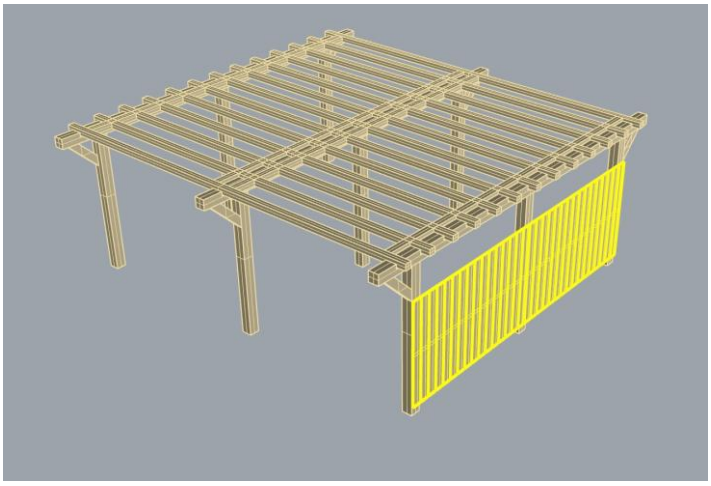
VAMITOOLS Autóbeálló – 427-es típus

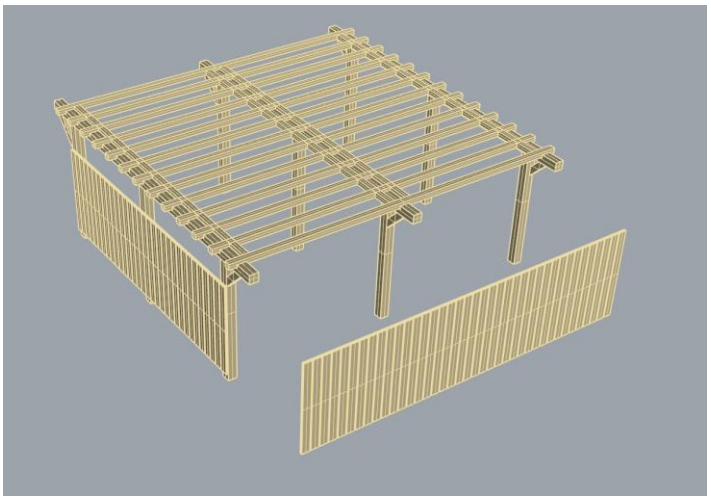
Makettragasztót (Rewell stb.) NE használjanak termékeinkhez, mert az oldószere kárt tehet az egyes alkotóelemekben (főleg a vékonyakban)! A következő ragasztókat ajánljuk: Loctite Super Attack pillanatragasztó, kék tubusos Új Technokol Rapid (acetonmentes), kétkomponenses ragasztó (Epoxy Rapid, Araldite stb.). Bővebb információ a ragasztással, festéssel, anyagtulajdonságokkal, stb. kapcsolatban a minden termék oldalán elérhető általános tájékoztatóban van!

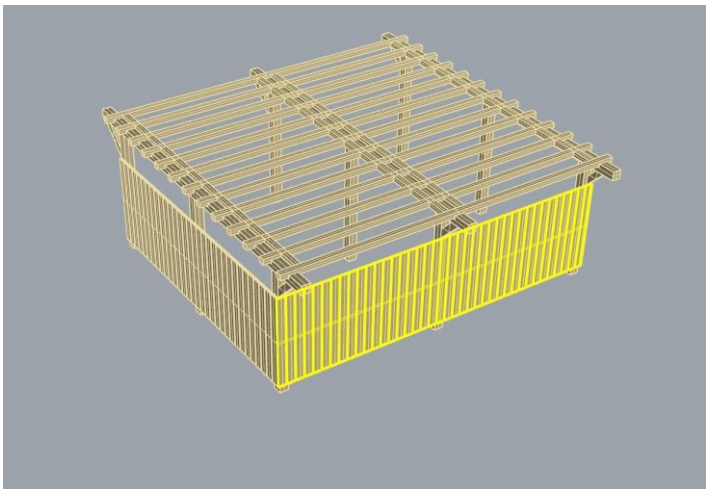


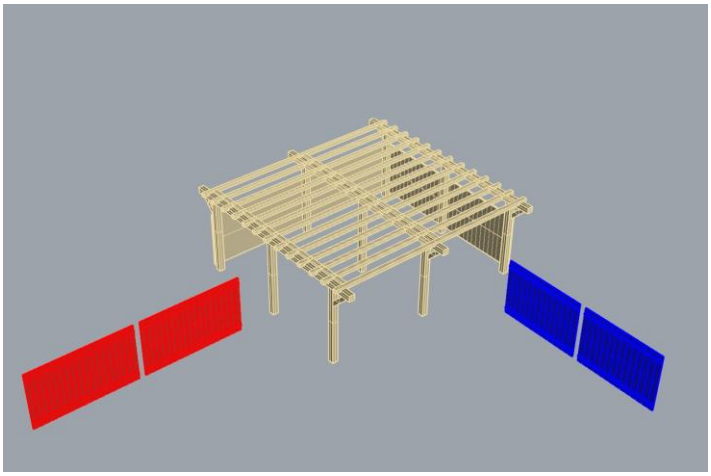


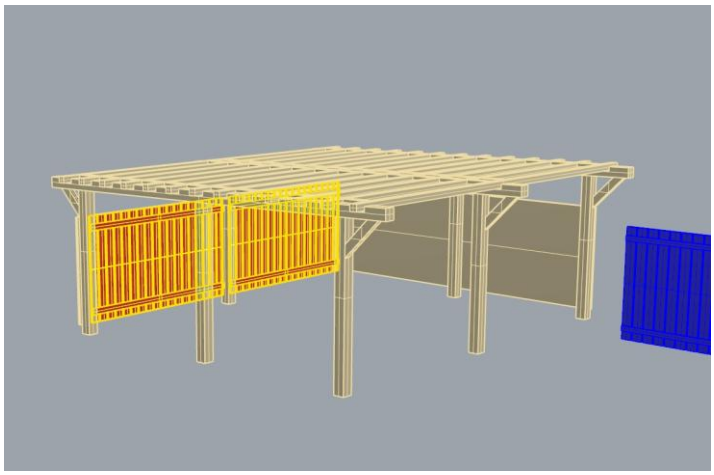


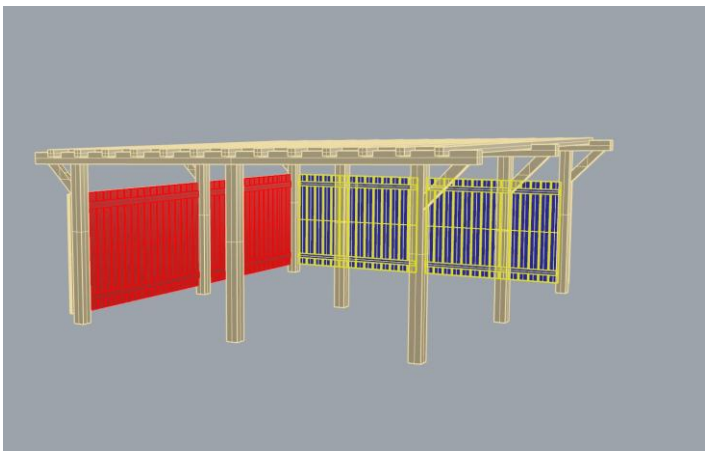


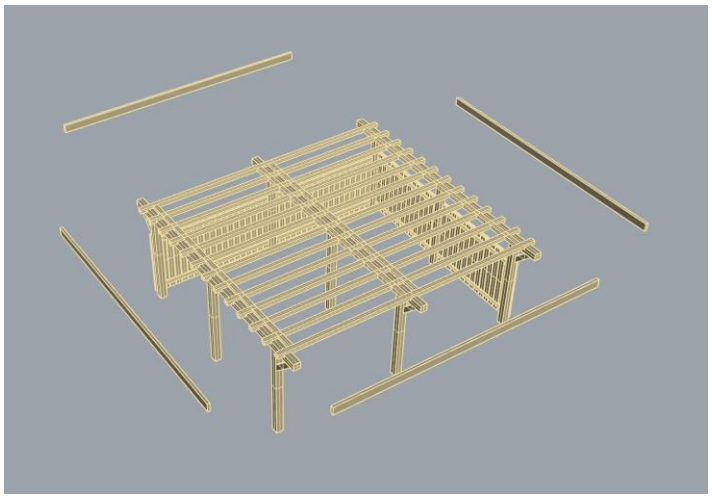


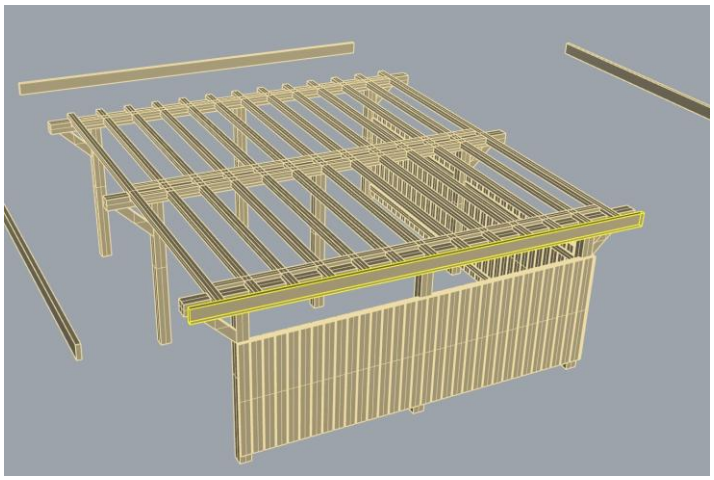


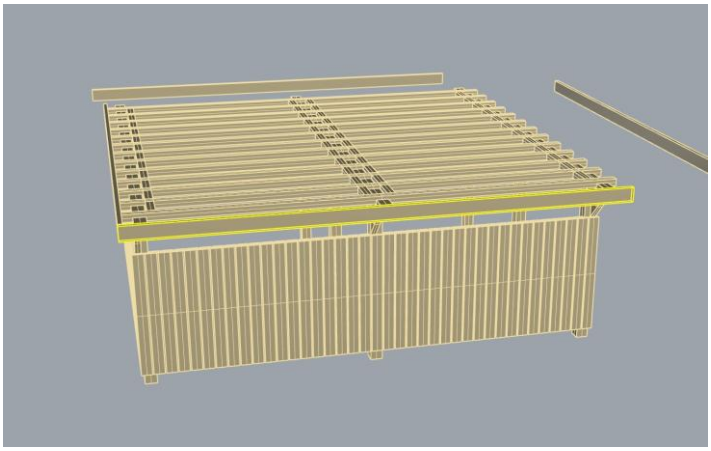


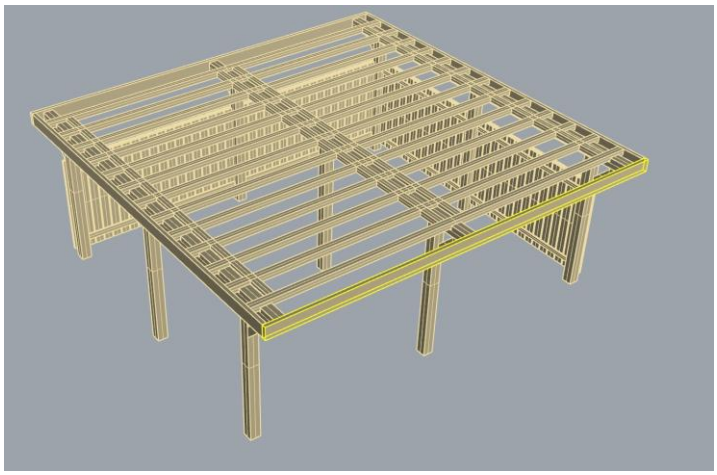


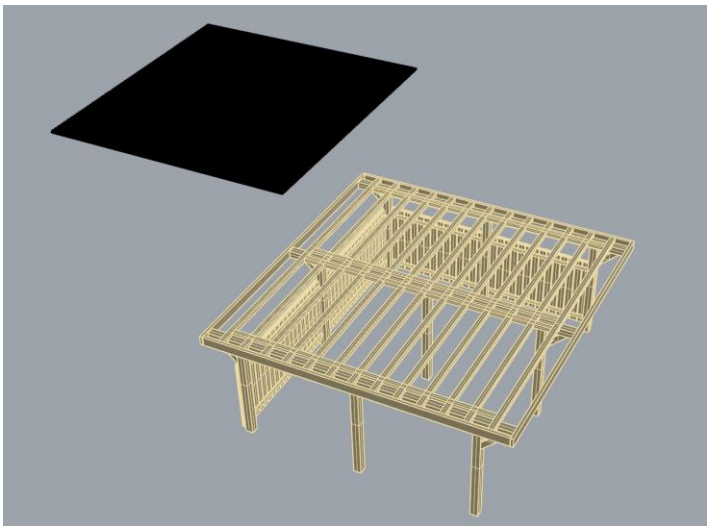


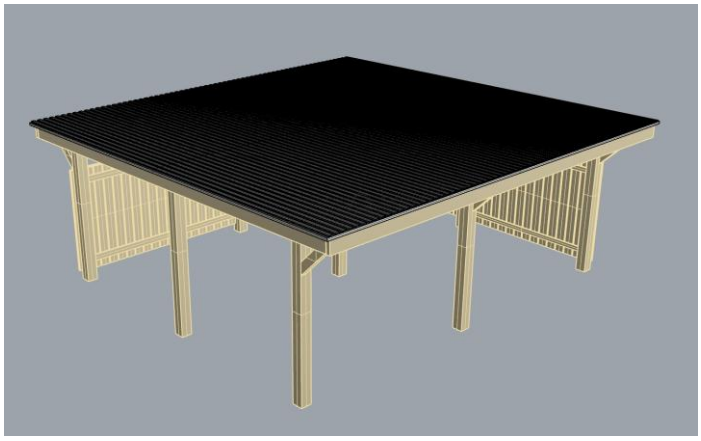


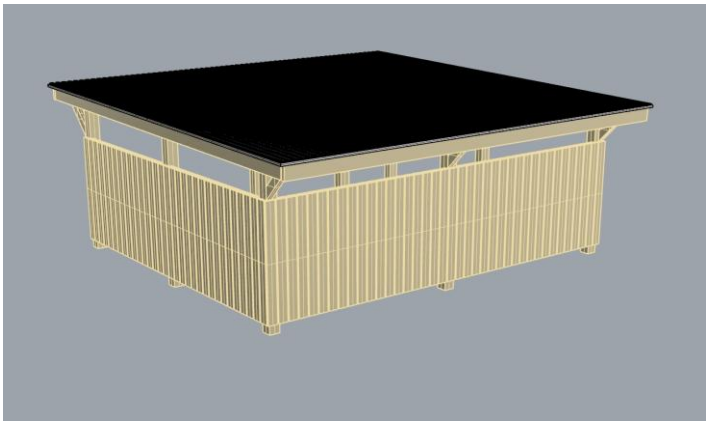












Készen is vagyunk.
